

# FILMING & EDITING WITH A SMARTPHONE

To save time and avoid misunderstandings we strongly recommend you bring the following to the course:

- Smartphone or iPad: IOS iPhone 5S and onwards or Android Samsung S6/S7, S8 or like. Also Oneplus 3 or 5, Huawei P9
- Lavalier microphone for smartphone. You can check it [here](#) and [here](#)
- A universal [clamp](#) or case for your smartphone model
- Light video/photo tripod
- Bring your own tablet or laptop for easier editing

Participants must have access to an App Store or Google Play Store to get the needed applications. A credit card connected to the App Store or Google Play Store may be needed to install the applications. It is recommended to use paid apps as free ones are not as efficient (especially with Android)

If you don't possess the equipment above, check with us at [info@cleareurope.eu](mailto:info@cleareurope.eu) to see whether we can provide it or not.

## In terms of apps, you need:

**Iphone:** already included iMovie + FiLMiC Pro (8 EUR)

**Android:** PowerDirector + FiLMiC Pro (up to 10 EUR for both)

FiLMiC Pro offers better settings during the shooting and more tools to improve your picture. PowerDirector and iMovie allow mobile editing in a professional way.
